

WEDNESDAY, June 26, 2002 (Continued):

1:00 p.m.-- **Session #5 (see below)**

4:00 p.m.-- Bus departs for Marymount or optional trip to Potomac Mills Shopping Outlets

SESSION #5

Administrative Strand

5A Communicating with your Techie: This session will feature “buzz-words” and fundamentals of networking technologies necessary for school-based leaders to make effective decisions (1-2:30 p.m.)

5B Techie Panel: A panel of experts will respond to specific technology issues and questions related to infrastructure, planning, curriculum integration and more (2:35-4 p.m.)

Instructional Integration for Teachers

5C Integrating Inspiration into the Curriculum (K-12): Learn how the graphic organizer software program, Inspiration, can be used as a teaching tool and as a writing support for students. This program can be integrated in every part of the curriculum at all grade levels (1-4 p.m.).

5D Using Multimedia in Your Classroom: Utilizing such programs as PowerPoint, Microsoft Producer and Video Editing Program, it is now possible to incorporate a wide array of audiovisual materials into your classroom lessons. This workshop will illustrate the potential of using technology for classroom presentations, parent nights, and websites (1-4 p.m.).

5E Operation Web Quest, K-12: To introduce teachers to the Web Quest model as well as other methods to teach children effective ways to use the internet. Learn techniques, resources, etc. to help make the internet a helpful addition to your classroom (1-2:30 p.m.).

5F Problem Solving: Why we need it. How to teach it. 9-12: Higher problem-solving skill is identified as a requirement for the technologically literate citizen. This session will provide a model of how to effectively run an open-ended problem-solving project (2:35-4 p.m.).

Real Techies Only!

5G Windows 2000 Server in an Active Directory Mode (Using the Domain Controller): Explore the Windows 2000 Server in an Active Directory Mode and functionality of the Domain Controller. We will look at connecting to a Novell environment and the MAC environment (1:00-2:30 p.m.).

5H Building Interactive Web Pages using MySql Database and PHP Part 1: In this first of a two part session we will look at MySql Database and some of the fundamental concepts involved in building databases that are at the heart of creating effective interactive websites (1:00-2:30 p.m.)

5I Leading Edge Solutions: Insights into new technologies including wireless solutions, PDA and cellular phone integration and other new and breaking technologies (2:35-4 p.m.).

5G Windows 2000 Server in an Active Directory Mode (Using the Domain Controller): This is a repeat of session #5G above (2:35-4 p.m.).

5H Building Interactive Web Pages using MySql Database and PHP Part 2: This is a continuation of session #5H above.
